"Truth is the most powerful propaganda." — J.F.C. Fuller

Colonial Heights Embraces White Nationalism

On Saturday, April 4th, the Southern Christian Leadership Conference (SCLC) bussed 600 Blacks into all-White Colonial Heights, Virginia to demonstrate for forced integration of the city. Though the Mayor and city politicians greeted the marchers in typically spineless fashion, the local residents turned out to jeer them. In fact, there were more locals heckling the march than their were marchers.

The Southern National Front obtained a permit to march in Colonial Heights the following weekend to mobilize local support for White Nationalism, and the National Democratic Front joined the effort. On Saturday, April 11th the SNF brought up 15 of their activists from North Carolina to join their 10 local activists in Virginia, and the NDF brought down 10 activists

See COLONIAL HEIGHTS, Page 2

Close to 300 people showed up at the Colonial Heights courthouse to hear White Nationalist speakers from the SNF and NDF.

AIDS - A Nationalist Perspective

By Don Hunt

"Everybody knows that pestilences have a way of recurring in the world, yet somehow we find it hard to believe in ones that crash down on our heads from a blue sky. There have been as many plagues as wars in history; yet always plagues and wars take people equally by surprise."

**Albert Camus,
The Plague**

AIDS! We have all read about it; been bombarded with information about it from mass media magazines like TIME and NEWSWEEK and THE NEW YORKER. Since the first reported

cases of AIDS (then called the Gay Related Immunodeficiency Disease or GRID) in 1981, the drumbeat of information and misinformation has been incessant. It has also gotten more strident and urgent as new information has been discovered, and as the death toll has mounted.

The statistics have become familiar and the projections ominous. The National Academy of Sciences estimates that there will be 270,000 cases of full-blown AIDS in the United States by the year 1991 with 179,000 deaths. At present, the number of people coming down with AIDS is doubling every year. The World Health Organization estimates that between

5 and 10 million people now carry the AIDS virus, and as many as 100 million will become infected during the next 10 years. AIDS is 100% fatal, so if these projections are correct, and if no cure is found, as many people will die of AIDS as have died in all of the wars, purges, and massacres in the 20th century. Ten million deaths are projected in the United States alone by the year 2000. These statistics are so grim because this is a slow acting virus with an incubation period of 4 years or more. By comparison, the Black Death in the year 1348 left 20-25 million dead in Europe. It had an

See GAY LOBBY, Page 4

Colonial Heights

From Page 1

from Washington to participate in the march. Despite the small number of SNF and NDF members present the event came off exceptionally well due to a groundswell of support from the residents of Colonial Heights and surrounding towns.

About 100 people began the march with around 80 carrying Rebel Flags brought up by the SNF, and as the march proceeded even more locals joined in to swell our ranks to over 130. The local sheriff lied to the press and said that no locals participated in the march, and this lie was reported as truth even though the reporters could see the locals in the march waving and yelling to their friends on the sidelines to join in. Between 500 and 600 lined the march route and they were eager to receive SNF and NDF literature.

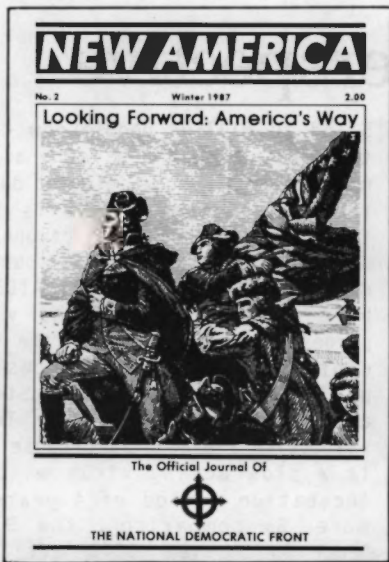

Nearly 300 showed up at the courthouse afterward to hear White Nationalist speakers including Cecil Cox and Gordon Gray of the SNF, Gary Gallo of the NDF, and Bob Hoy of the Populist Democrats.

All who participated were elated by the friendliness of the locals and by the extraordinary support they lent to a demonstration that was organized by outsiders. GG

A young NDF member with the flag of our Movement flanked by two SNF supporters carrying Confederate flags in Colonial Heights.

NEW AMERICA – The Radical Voice of American Nationalism

The NDF's journal **New America** is a radically new type of nationalist publication. It provides an ideological arsenal against the distortions and misconceptions spread by the government and the media. **New America** presents a new world-view based on racial and national realities, and provides alternatives to the materialism of both capitalism and communism. The reader is given an in-depth and straightforward analysis of what nationalism means for America. This journal provides working answers to the problems that plague our Race and Nation.

This edition (No. 2) includes:

- **On Nationalism: America's Way**, forging the new revolutionary ideal.
- **Looking Ahead: A vision of America's future.**
- **Jefferson's Notes:** Thomas Jefferson's thoughts on race are recovered from the Memory Hole.
- **The New Racialism:** Why the races must live and develop separately.

To order your copy of **New America** No. 2 send \$2.00 to:
The Nationalist, Suite L290, 444 N. Frederick Avenue, Gaithersburg, Maryland, 20877.

LETTERS

Dear Gary,

It has taken quite some time for me to receive the nationalist material that you sent me. It was sent to the Home Office to see if it was "suitable" for me to have. Fortunately, it was and on receiving it, I can honestly say it was worth waiting for. I found your material very good reading; you obviously hold the right solution for the American people and I wish the NDF every success in the future.

The sentence imposed on me was to say the least "heavy", but if they think by imposing this sentence that they will break my spirit they are wrong, and I think I speak for most Nationalist prisoners when I say this. Locking us away can only make us stronger and more determined to continue the struggle upon our eventual release.

I have come across quite a lot of support for our Cause amongst fellow prisoners. I find with a lot of people that they still hold the misconception that Nationalism is extreme "right wing" (the Zionist media label), once it is explained to them what true Nationalism is, they become most interested.

I look forward to receiving future issues of *The Nationalist*, and once again I wish you all the very best for the future. We hold the truth and the only hope for our people,

Racial regards,
Kevin Turner, Skullhead
H.M. Prison Acklington

Editor - Kevin is one of the many National Front political prisoners being held in British jails. He was one of the leading activists in the Manchester Branch of the NF which is led by Colin Todd. Kevin was also the leader of the skinhead band Skullhead. There is an excellent article in the latest *Nationalism Today*, the magazine of the NF, about how NF activists are being framed and then tortured once

they are arrested in Ulster. A copy of NT can be gotten by sending one dollar to the National Front, P.O. Box 228, Manor Park, London E12.

Dear Comrade Gallo,

Thank you for the April issue of *The Nationalist* which carried the front page legend: NF Marches Forward in Britain. We are flattered that you should give over vital space in your journal to an analysis of our strategic position, and for that we are most grateful.

However, we must point out to you that the **impression** - perhaps unintentional - your article conveyed on the matter of our intervention in Ulster is essentially false. The National Front is not in Ulster in order to bolster up Protestantism or reactionary Unionism in all its forms. We are there to transcend the mindless block politics of both Orange and Green. This is a perfectly logical position to take given that the NF is made up of Catholics and Protestants as well people from Northern and Southern

Ireland. We reject both the Irish Republican non solution and sterile Unionism. Sectarianism has no role in our efforts to build a Third Way for all of the people of Ulster. Indeed, sectarianism is actually a card used by by our enemies to divide.

We believe that an independent Ulster, free of the corruption of the Irish Republic and the tyranny of the British government, is the only way that all of our people, Catholic and Protestant, can attain social justice. The NF is, therefore, appealing to all citizens in Ulster and we are beginning to make headway as a number of our Ulster units are now composed of Catholics and Protestants.

We are a force that looks to Ulster's National Revolutionary future, and not her sorrowful and war torn past.

With every good wish for your journal and the NDF, I remain,

Yours for National Revolution,
Derek Holland
pp Executive Council, NF

DISTRIBUTE THE NATIONALIST

One of the most important things that you can do to support the White Nationalist Cause is to sell or distribute copies of *The Nationalist*. You can purchase current issues at the following rates:

2	copies	\$1.00
5	copies	\$2.25
10	copies	\$4.00
20	copies	\$7.00
50	copies	\$15.00
100	copies	\$25.00

Make check payable to The Nationalist and specify which current issue you are ordering.

Gay Lobby Thwarts AIDS Policy

From Page 1

incubation or contagion period of two weeks or less, and if you should have had the misfortune to contract the disease you still had a 50% chance of surviving.

Looking at these grim figures, one would suppose that the responsible public health authorities would take all possible precautions to control the disease. But this is not so, as AIDS has become de facto a politically protected disease. The Center for Disease Control in Atlanta estimates that in the United States, of all current AIDS victims, 2-3% are prostitutes, 20% are IV drug abusers, and 75% are homosexuals! The last category is a well organized, politically powerful special interest group which has managed to hi-jack the concept of civil rights and protect itself from the inconvenience of being labeled a public health menace (CDC studies have estimated that between 80 to 85% of the homosexual population in such cities as San Francisco and New York are already infected with the disease and given the well known promiscuity of this group pose a threat to society at large.) It is true that homosexuals did not create the AIDS virus, but they did play the major role in delivering it to this country.

GAYS THWART HEALTH OFFICIALS

According to Major Robert Redfield, one of the Army's chief AIDS researchers, the Gay Lobby has so intimidated public health officials that they are unwilling to take the most basic steps to stop the spread of this fatal disease. Not only are state health officials unwilling to advocate widespread testing, they are not even willing to do the contact tracing that is done with all other venereal disease once a person is found to be infected. For example, if a person is found to have syphilis in a public medical clinic, the clinic will ask for a list of all people that that person has had sex with and will then contact those people so that they might be tested for the disease. In this way the spread of the disease can be stunted. But Gays and their allied Civil Rights lobbies have

prevented this basic procedure from operating in the case of AIDS. Redfield says that public health officials are so frightened of these lobbies that in each of the 50 states they have even refused to accept names from the Army of those in their communities who have tested positive for the AIDS virus in military enlistment examinations. Such is the state of our political system.

MOSQUITO BORN AIDS

AIDS is labeled a sexually transmitted disease (STD) which means that one "fast track" method of contagion is by sexual contact with an infected person (male or female). It is also well known that AIDS is spread by blood and blood serum through blood transfusions from a contaminated source, or through the sharing of needles by intravenous drug users. AIDS is spread by any contact with the blood system of an infected person, which includes but is not limited to invasive medical procedures such as dental work and surgical procedures. The British medical journal *Lancet* for Sept. 28, 1985 reported that the AIDS virus could remain alive for up to 10 days in such hostile environments as a petri dish or dry test tube, only to be reactivated when it came in contact with body serum. Other studies reported in the *Journal of the American Medical Association* have stated the same.

It is less well known that several other forms of transmission have been reported. According to *Remnant Review*, Dr. Mark Whiteside and Dr. Caroly MacLeod of the Institute of Tropical Medicine in Miami, Florida discovered and reported evidence that AIDS was being transmitted by mosquitos in the tiny town of Belle Glade, Florida. They presented their findings, in April of 1985, but were ignored by the media and public health authorities who continued to insist that direct contact with the bodily fluids of an infected person was required for contagion.

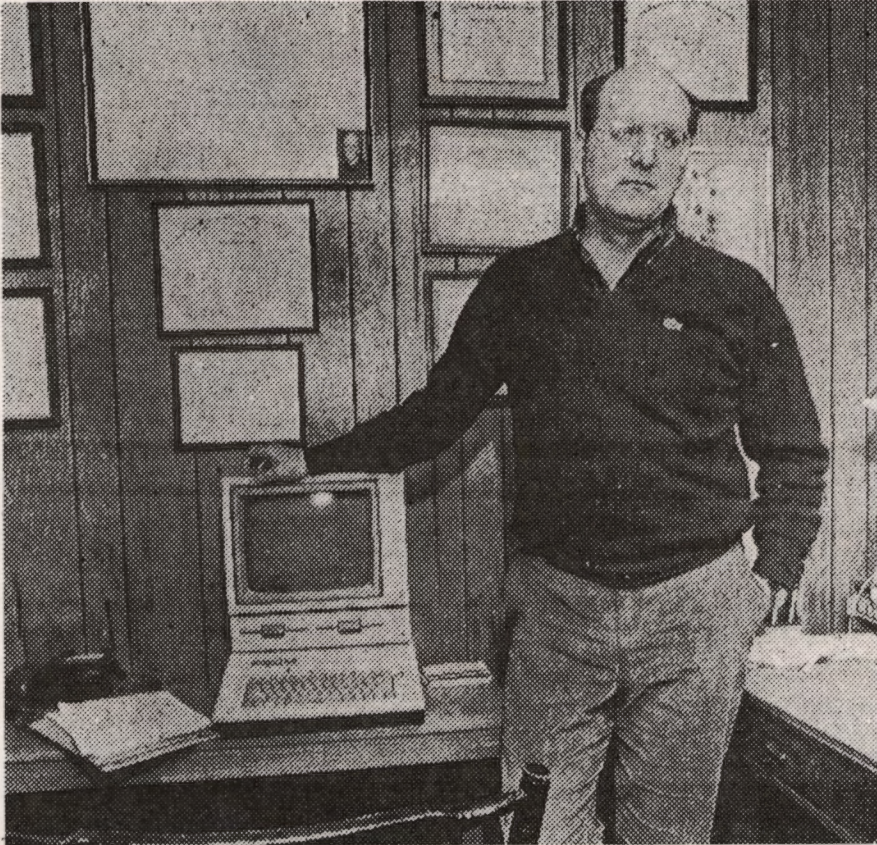

Though it is less common, it has been reported in *Lancet* (Dec. 22/29, 1984) that AIDS could be

transmitted to an uninfected person through saliva in intimate kissing. Contagions from mother to child either through in-utero contact or through breast feeding has been reported. In short, the AIDS virus may be spread horizontally through sexual contact or saliva (rare) or through infected milk, vertically from mother to child (in utero), or mechanically through infected needles, blood sucking insects, or contaminated blood donations.

It should be borne in mind that though some forms of transmission such as through biting insects have been rare to date, it does not mean that this will necessarily be so in the future. As scientists are discovering in AIDS infested populations such as those in Africa or in Florida, once a certain level of infected persons is reached through "fast track" methods, the disease will continue to spread out of the host population through "slow track" methods. In short, transmission is a function of the number of carriers in a population and the presence of suitable vectors for blood transfer or the prolonged crowding of infected individuals.

SAFE SEX?

Given the facts cited above, and the horrifying projections of epidemiologists, we would expect that the responsible public health authorities would take swift and effective actions to halt the spread of this disease. This has not been the case. Officials have placed their sole reliance on ... **education**. Carefully, so as to not tread on "gay" feet, the Surgeon General and other authorities are relying on education and moral suasion to stop the on-rushing epidemic. Education has not worked to stop such behavior as smoking, so why should it be expected to alter such deeply rooted behavior as sexual intercourse. The answer has been "safe sex"-- a dangerous delusion. A 1983 study by the Centers for Disease Control in Atlanta surveyed 50 male homosexual AIDS patients and 120 male homosexual "controls". Though the promiscuity of homosexuals was well known, scientists were surprised to find that the median

Major Robert Redfield charges that the Gay Lobby has intimidated public health officials from adopting an effective AIDS policy.

number of lifetime sexual contacts was 1,100 with a few subjects reporting lifetime sexual contacts of 20,000!! A subsequent study of condom usage revealed that even using condoms there was a one in five chance of infection and that even with all the publicity about "safe sex" most subjects studied did not use a condom at all.

The usual method of spreading AIDS into the heterosexual community (other than through needles or contaminated blood) has been through bisexual men. Both **TIME** and **NEWSEEK** have during the past month carried cover articles about the spread of AIDS to women and the heterosexual population. A recent study of married bisexual men revealed that 80% of the wives of these men were unaware of their husband's behavior.

Though it is illegal in most jurisdictions for IV drug users to sell their blood, homosexuals are still allowed to be blood donors. Public health authorities rely on blood screening tests to remove any infected blood. But a virus such as AIDS can modify its molecular structure and produce new strains

which are not detectable by current blood screening procedures. Within the past month, it has been advised that all patients who had a blood transfusion before 1985 be tested to see if they were infected with the virus.

SOLUTIONS

Dr. Richard Keeling, chairman of the American College Health Association's task force on AIDS, was recently quoted "...there is a despairing theory in health education that says until there is some horrible base-line number of people who have died, the disease doesn't become personal enough to the rest of the community for it to take fundamental changes in behavior seriously." Following are some proposed changes that a committed Nationalist should like to see adopted.

1. The NDF is not anti-homosexual as we see homosexuality as natural (though abnormal) in that it arises from natural causes such as genetic predisposition or glandular malfunction rather than from

environmental causes, but we nevertheless demand the destruction of organized homosexuality as it is a political perversion. To break the back of the Gay Lobby it will be necessary to outlaw homosexual behavior temporarily through anti-sodomy laws (such as now exist in only a few states). This will not stop homosexuality or even limit it, but it will end gay political activity and then we can start over again with a sensible policy toward homosexuality.

2. There must be regular universal and mandatory testing for AIDS so that those individuals infected with the disease can be made known to the authorities. This could be done, for example, by testing each individual when he or she applies for a driver's license or renewal, or for other public benefits and privileges. AIDS is a contagious disease and those having intimate contact with infected individuals should be made aware of this fact. Concealing such information should be an actionable civil offense, and knowingly communicating the virus to another must be a criminal offense.

3. Those individuals contaminated with the AIDS virus must be tattooed on a hand so that others can be warned of their condition and avoid having sex with them. Those who continue irresponsible behavior which might infect others must be quarantined just as lepers are.

4. All drug "shooting galleries", homosexual bars or bath houses, places of prostitution, or any places of public sex must be closed immediately.

5. All individuals entering the U.S. must be AIDS free.

6. Anyone donating blood must attest under penalty of law that they have not indulged in homosexual relations or IV drug abuse since 1975.

7. No AIDS carriers will be permitted to work as food handlers or to perform invasive medical procedures.

There are really no choices any longer. Due to the political pressure of self-interest politics we have waited too long. Either the above solutions are implemented as a coordinated program or tens of millions of our people will die horrible deaths and the medical costs of caring for them will grind us into poverty. DH

Big Capitalists Kill People Express

In 1981 the well-known People Express airline began with a special dream for success. Every employee would be an owner-manager, holding a significant chunk of People's stock and a share of the profits. The company told its employees from the beginning that it would thrive because of their hard work and dedication. Along with the owner-manager philosophy came the operation plan which made the airline unique: across-the-board, ultra-low air fares, and no frills. Although this meant passengers travelled without the luxury of the big carriers, at least they had a real choice. Fliers were thrilled to see fares like \$19.00 from Newark to Buffalo.

PEOPLES SUCCESS HERALDED

In 1983, after less than three years of operation, People's began to receive newspaper and magazine write-ups glowing with praise for the company's progressive management system. It served to attract eager, idealistic young people like Troy Hopper, who became a major partner in the airline. He was all in favor of putting into practice such a radical and apparently profitable management structure. The airline also made a great case study for instructing aspiring business managers and was cited extensively in books like *In Search of Excellence* and *Re-Inventing the Corporation*.

Yet the novel air fares of People Express threw the company into a five-year battle for survival against the rest of the industry. Its recent takeover by Continental, headed by airline czar Frank Lorenzo, had been the result of management mistakes which sapped money and morale. This January, Mr. Hopper had to accept the fact that his company, which pioneered no-frills flights and low cost flights for millions, would cease to exist.

INITIAL SUCCESS

Initially, People's philosophy and its operating plan met with great success. In the beginning the company was just three airplanes

flying between cities such as Buffalo and Newark. Soon, however, it expanded to 22 planes flying to the smaller eastern cities. Still a manageable size, it was easily run by its founder Donald Burr, who lead by example and charisma to keep his employees going. Nevertheless, the airline's downfall was not long in coming.

The year 1983 was the turning point when Burr purchased 50 planes from Braniff. Until then, People had avoided competing directly with major carriers by flying between smaller cities, but with the new planes came word that the company was now ready to battle head to head with United, American, and Eastern, in the big cities they controlled.

DEEP POCKETS PREVAIL

People's unique management philosophy, however, was not yet ready for a large company. Burr and his people failed to anticipate the bitter struggle ahead, and lacked the capital with which to deal with the monopolies. As Barry Gordon, the president of the National Aviation Technology Corporation said, "The problem was that People Express was going up against major carriers with deeper pockets that weren't going to give an inch or let their routes go to People Express."

Both able and willing to put up with short-term losses, the big airlines lowered their rates to match People's and managed to provide extra services as well. Sticking rigidly to no-frills, the airline played into the hands of competitors. By 1984 the company's profits were falling dramatically. Burr's move to purchase Denver based Frontier Airlines in October 1985 initially generated a lot of excitement and revived enthusiasm within the ranks. It was now felt that People could become one of the "big fish", able to contend with its opponents. Yet the purchase of Frontier turned out to be its biggest bomb, losing the company nearly \$10 million a month for nine months.

THE NEW ROBBER BARONS

The battle is now over. Former employees are sending out their resumes and people like Burr and Hopper have surrendered to their former archrival for jobs with Continental. Innovative and untried, the worker-owned People Express airlines was quickly eliminated by big business. Major capitalists, like the bosses at Continental, do not like new competitors, and with almost absolute power over the market, they are unforgiving of mistakes. Similar to the robber barons of the late 19th century they conspire to form pools, set prices, and band together against outsiders. They will accept only short-term price cuts to eliminate their opponents, and then they quickly reestablish high prices so long as no one is willing to intervene.

Under the NDF small competitive worker-owned companies such as People Express would proliferate and provide the people with real choices. Then low cost airfares, like \$19.00 flights between nearby cities, and other inexpensive services, would be readily available to all Americans. But so long as big business reigns unchecked, the plutocrats will continue to kill off progressive new companies which not only give the consumer a break, but give their employees a share in control and profits as well. MM

New Evidence on Nature vs. Nurture

Whenever possible the self-appointed experts of the media like to bombard us with "examples" of genetic equality. Relying on sentimentalism, but little if any evidence, they tell us that nature and not nurture plays the biggest role in shaping a person's attitudes and abilities.

However, a recent article in **US News & World Report** should set such dubious arguments to rest once and for all. In an intensive study of twins conducted by the University of Minnesota new evidence has been found to support the long held, but often suppressed, theory of genetics as a major influence on personality. More than 350 sets of twins, many separated since birth, served as models in the largest such experiment to date. According to the article, a follow-up report on the twins as adults found that "personality traits were influenced more by genes than by upbringing."

PERSONALITY IS GENE DEPENDENT

The report goes on to say that things like social potency, alienation, well-being and harm avoidance were all found to be products of nature, not nurture. Even such qualities as respect for authority, adherence to high moral standards and criminal tendencies were found to be highly dependent on heredity.

This final conclusion might con-

vince sceptics that the behavior of Blacks and other non-Whites in contemporary society is based on racial differences. Of course the liberal social scientists are in a furor, and are desperately defending their "sanctified" beliefs of environmental supremacy. But as David Lykken, a psychologist involved in the twins project, explains about the new experiment: "Part of our study is simply replicating what has already been proven. We're just showing it with a larger number of twins, and for the first time, with those who were raised apart". In other words, the power of genetics has long been known, however, only a thorough scientific study can discredit the racemixing propaganda of our current System.

Environment continues to play an important role in terms of a person's experiences and the shaping of their personal abilities. Yet, as Lykken insists, many modern psychologists shun serious genetic research for fear of its obvious implications.

SOCIAL ENGINEERING THAT WORKS

Lykken explains that his kind of research, "is supportive of social intervention-- but intervention in ways that will work". If, for instance, a person is genetically aggressive, that trait cannot be

erased. Instead that drive must be recognized and channeled in positive ways. The argument that one creates intelligence or attitudes simply through schooling is considerably weakened by Lykken's findings.

Training, practice and conditions simply help bring out a person's natural talents, but there must be something to build upon first. A case in point: General George S. Patton had the inborn talents to be a military leader, Chuck Yeager, a natural daredevil test-pilot, and Boris Becker, a natural tennis pro.

Unfortunately, the System fears healthy attitudes regarding genetic differences and does its best to cover-up or ignore evidence which has been common sense to most people all along. Now we are paying the ultimate price for our establishment's criminal social attitudes. Non-Whites are expected to live up to White standards, which only results in disappointment, resentment, and strife. Only Nationalists will change this wrong-headed attitude and take heed of the findings of men like Lykken. If not, then we shall see the further decline of White Americans in a sick society which is doing its best to degrade and punish our people for their real abilities and prevents individuals from being the best they can be based on natural differences. **MM**

An Introduction to the NDF- On Videotape

This VHS videotape is of a meeting of the **National Democratic Front** that took place in Washington, D.C. on March 22, 1987. It features speeches by Matt Malone and Gary Gallo and provides an excellent overview of what the NDF and Democratic Nationalism are all about. An informative and unedited question and answer session follow the speeches as Gary Gallo fields comments and questions from the audience.

To order this introductory videotape (VHS only) send \$12.00 to: The Nationalist, Suite L290, 444 N. Frederick Ave., Gaithersburg, MD 20877.

SHORT BURSTS

RACEMIXING AND MURDER

In Miami, Florida, an 18 year old woman, along with her boyfriend and his cousin, were arrested in the strangulation of her stepmother whose hysterical screams were heard over the phone as she called the police for help. At 8:20 am on February 19th, the woman's desperate pleas came over the 911 emergency line. Police reported that the victim, Vaughn Robinson, had called saying an intruder was in the house. As a police spokesman said afterworks, "There was a black male in the house. He was coming after her. She was hysterical. He was assaulting her. She was unable to speak. You could hear the woman choking and gasping for breath, then there was silence". Soon after rushing to the scene an anonymous tip lead to the arrest of Ms. Arwood and the two males. What makes this senseless crime particularly horrible was the motivation on the part of the guilty. It was later explained that the victim and Ms. Arwood, both White, had quarrelled about the young woman dating Blacks. This led to her Black boyfriend, his cousin, and herself, deciding to commit the brutal slaying. MM

SOME ENVIRONMENTAL PROGRESS

New Jersey has joined Rhode Island in passing a law that will require its residents to sort their garbage in order to save glass, plastic, aluminum and paper for recycling. By the fall of 1988 homeowners will be required to comply with the law and the systems that the counties come up with to enforce the recycling measure (such as color coded trash bags.) We applaud this law as it will help preserve our precious natural resources and will reduce the amount of landfills necessary by an estimated 25%. This measure, combined with a bottle deposit law to fight litter, will revitalize our stagnant recycling industry. New Jersey's chief of recycling says this is the sort of law that people want to comply with, and we agree. GG

White Revolution -

THE ONLY SOLUTION

We have been asked if the National Democratic Front will work within the System with the conventional political parties. We will not. Though we are determined to take power through legal means, our object is revolution, not reform. Once we are in control we will eradicate the philosophy of self-interest and will transform the political and social structure of America into a new Dynamic Order.

The Establishment is corrupt and inept not because we have happened to elect an extraordinary procession of bad leaders, but rather because the System is fundamentally flawed and so must be completely overthrown. Only the evil rise in the present plutocracy as pluralism enshrines self-seeking.

Our New Constitution will eliminate the system of checks and balances which has paralyzed our government and has caused our people to lose faith in our power to control our destiny. Fewer than 38% of eligible voters now bother to turn out for Congressional elections as they know that the politicians are bought and paid for by the special interests - we have the best Congress that money can buy, as Will Rogers once put it.

Good leaders naturally shy away from a system in which they are deprived of the power to act or to pass laws for the benefit of the nation as a whole. So our politicians are men of the worst sort - those who exploit their positions for their own advantage.

We of the NDF are political leaders, not politicians. Politicians are compromisers, and we refuse to compromise as compromise is the antithesis of reason and the enemy of purity. Only revolution can sweep away the refuse we call American politicians, and the NDF is the instrument of that revolution.

For more information on our program contact: NDF, Suite L290, 444 Frederick Ave., Gaithersburg, MD 20877; (301) 670-0159.
