"Terror at the place of employment, in the factory, in the meeting hall and on the occasion of mass demonstrations will always be successful unless opposed by equal terror."

MEIN KAMPF, Vol. One, Chap. II

Fall Building Campaign Opened

Commander Koehl has just opened an important new campaign for building the Party. The Fall Building Campaign was announced in a special letter from the Commander to all Party members and Official Supporters. In his letter he stated the goal he expects each Member and Supporter to attain during this drive.

Every National Socialist is asked to throw himself wholeheartedly into this drive and not consider his work completed until the stated objectives of the Campaign have been accomplished. Meeting these objectives requires no special circumstances or resources. Therefore, the task before each comrade can be accomplished by showing sufficient determination for getting the job done.

Use the special numbered card sent to you with the letter to show your support for this Campaign. Fill it in and return it to Party Headquarters without delay.

Facts on WHITE POWER MESSAGE Installations

The White Power Message (WPM) service is one of the best means the Party now has for reaching new persons. A single WPM installation is capable of delivering as many as 5,000 two-minute propaganda messages per week. Ordinarily it requires little care or attention beyond periodic message changes and routine maintenance every few months. There is no good reason for not having at least one WPM installation in every U.S. metropolitan area with a population over 200,000—and half a dozen "live" National Socialists. Nevertheless, the Party's experience has been that difficulties of one sort or another will nearly always beset persons trying to get a WPM installation on the air or keep it on the air. The instructions listed below are intended to eliminate or, at least, to minimize these difficulties.

1. The most important single consideration for a WPM installation is a secure location.

Federal regulations require that the address at which the WPM service is located be available to the public on request. Many states require that the address be announced in each message.

In any event, the Jews, liberals, and Negroes in your area will leave no stone unturned in their effort to prevent the public from hearing the Party's messages, and the first thing they will look for is a way to deny you the use of the physical premises where the WPM is located.

Best is a location you own. If you own your home, and if you have no worries about the safety of anyone living there, you may want to consider locating the WPM there.

If you rent a location, you need rent only a tiny, cheap office. Even a sturdy broomcloset with a telephone connection will suffice.

But, if you rent, you must have an absolutely secure lease, preferably for a period of at least two years. It is a good idea to take a copy of the owner's lease agreement to a competent lawyer and to fully explain the situation to him. Have the lawyer make any modifications of the lease which he feels are necessary to keep the owner from being able to evict you. If the owner won't accept a lease agreement which your lawyer feels is secure, find another location. There is no point in wasting time and money to get a WPM on the air, just to have a terrified landlord evict you the next day.

One thing to be wary of is an arrangement where the owner has direct control over your utilities. If you rent an office in a building which does not have separately metered electric service for your office, the owner may simply unscrew your fuse in his basement, thus putting your WPM out of service.

Remember, our racial enemies will not hesitate to apply financial pressure or the threat of physical violence in an effort to silence the WPM. The average landowner, even if he is sympathetic to the Party, is not prepared to resist this pressure.

2. In addition to a telephone line, you will need to have the telephone company install a recorder coupler, model KS 19522 L 1. Since these couplers may not be stocked in some areas, you should place your order for installation with the telephone company at least a week in advance of the time you plan to go on the air.
3. If your WPM will be operating in a toll-free area with a population over about 400,000 you will eventually need more than one telephone line to handle the volume of calls. You should count on roughly one line for every 200,000 persons who can dial the WPM without paying a long-distance toll. It may be several months or a year before you reach this saturation value, but you should make allowance for expansion from the beginning by requesting that the telephone company reserve a block of consecutive numbers for you. If this is done, then your WPM will be able to retain its original telephone number as you add more lines. These additional lines will be connected in rotary-testing sequence and will ring when the original number is dialed, if all lower-numbered lines are busy.

If you fail to reserve additional consecutive numbers at the time of your original installation, then you will be obliged to accept a different WPM number when you add your next line.

4. In some areas the telephone company may not want to provide you with service if they know you intend to install a WPM service, but they have no choice in the matter. Be firmly insistent but businesslike, and they will generally comply with the law. The telephone company in most areas is entitled to require a cash deposit from you before giving service, however. This deposit may range from \$25 to \$100 per line, but it is refundable in full if you pay your telephone bills promptly for a specified period of time.
5. The telephone company will charge you approximately \$20 for the line connection and coupler installation. Your monthly bill from the telephone company will be approximately \$12, including the rental charge for the coupler.
6. There are several manufacturers of telephone answering devices, and if you have or can obtain any device which is serviceable, you may want to use it, at least initially.

The Party has found that the Code-a-phone, model 200 D, manufactured by the Electrospace Corp., is also satisfactory but does not hold up as well under heavy usage and may require more maintenance.

The Code-a-phone, model 200 D, will cost you \$350 for each unit and may be purchased on a time-payment plan if you desire. Payments will be about \$20 per month.

7. You will need a tape recorder of good quality to make message changes. We will mail you prerecorded message tapes from HQ approximately once a week, and you can then transfer the messages to your WPM device with the use of your tape recorder.
8. You will find that relatively little advertising will be required to keep your WPM service saturated with calls, after the first few weeks. Most persons will find out about the WPM by word of mouth. As soon as your installation is complete, the Party will print for you, at cost, advertising cards and leaflets with your WPM number on them.
9. In summary, here is what you should do to get a WPM on the air in your area:
 - a) Ascertain that you will be able to meet the monthly expenses of the WPM, either by yourself or in collaboration with other local National Socialists. If you buy a message device outright and don't have to rent a location, your only monthly expense will be a telephone bill of about \$12. If you purchase the message device on a time-payment basis, your total monthly expense will be \$30-\$35, plus any rent for a location.
 - b) Decide on a completely secure location for the WPM and make any necessary arrangements.
 - c) Place your order with the telephone company for a line and a coupler. Don't forget to reserve additional consecutive numbers, depending on the size of the city where the WPM will be located.
 - d) Contact your local Code-a-phone (or other) distributor and place your order.
 - e) As soon as you know your WPM telephone number, contact Party HQ. We will print advertising matter for you and airmail you your first message.

Activity of the Month

The great unrest in the construction industry calls for the immediate response of all National Socialist activists. While arrogant Blacks attempt to elbow aside White workers, the resulting polarization must be fully used for the benefit of the Movement.

With unending pressure from Black militants and the anti-White policies of the Nixon regime, White working men everywhere are beginning to ask themselves what's to become of their jobs. Therefore, the atmosphere is ripe for spreading the word of National Socialism on every construction site in the nation, not just those which have already been afflicted by Black rabble demanding the jobs of Whites.

To fully benefit the Movement, the Party has just prepared a leaflet for workers on the present labor crisis. Enclosed is a sample copy of "Who's for the WHITE Working Man." This leaflet is intended for distribution at all construction sites in your area.

For best results, take the leaflet right to working men on the job. If you're dressed more or less like the rest of the workers on the scene, you can probably get leaflets around to all of the Whites before being asked to leave. If barricades prevent your entering the construction area, go to the workers on their lunch break. If this is not possible, you'll have to look for the workers' automobiles and leave a leaflet on each windshield tucked under the wiper. This, however, is the least preferable method for putting out this leaflet.

Another method for getting the word out to workers is to find out when their local craft unions are meeting. Current unrest in the construction industry has precipitated high attendance at union meetings. Call the unions and find out dates and times of the meetings. Show up early to hand out leaflets to union members as they fill their hall. Try to gain some insight on how union members dress for their meetings, and dress accordingly. The chances are if their meeting is held in the early evening, they'll go straight from work in their work clothes, but if the meeting is later, dress will probably call for coat and tie.

Personal contact with the White workers should be striven for so you'll have an opportunity to sell newspapers along with the leaflets. Never pass up an opportunity to sign up a sympathetic workman as an Official Supporter of the Party. Sign them up and give them a handful of leaflets to pass out to others.

New Item Available from NS Publications

A National Socialist Chronicle: 1889 to 1933 by Hans Volz has recently been reprinted from *NATIONAL SOCIALIST WORLD* No. 5. If you have not read this impressive chronology of the events leading up to the triumph of January 30, 1933, you owe it to yourself to get this new booklet without delay. Even if you read this article in *NATIONAL SOCIALIST WORLD*, you will probably want a copy of this handsome reprint. It contains several illustrations which were not included in the NSW edition.

36 large 8½ x 11 inch pages bound in sturdy Leatherette cover.

Order *A National Socialist Chronicle: 1889 to 1933* today from NS Publications, Box 5505, Arlington, Virginia 22205. \$1 per copy.
